SPRING PLANTING SPECIALTIES

from

GLENWOOD NURSERY

New French Pussy Willow

THE TALK OF THE TOWN

This great shrub at our low price means a quick sell out—order yours to-day.

Plant one, one hundred, one thousand. The cost is slight compared with the heaps of genuine pleasure and satisfaction that is yours, if you plant French Pussy Willow this Spring.

The Only Outdoor Shrub Grown from which You Can Cut Bouquets During the Winter Months

A select and improved new type of Pussy Willow, perfectly hardy anywhere in the United States. The branches of this cultivated variety are being used by florists in cities for winter decorations and are bringing high prices. They are very fragrant.

Buds and Blooms Very Large

The buds, or catkins, are from one to two inches long after they come out in bloom, and make a very dainty yellowish pink and silvery bouquet.

Finest Winter Bouquets

The branches can be cut in December, January or February, placed indoors in a vase of water, and they will at once burst open into bloom. When they are in full bloom they can be taken out of the water and they will retain their beauty for months, or until they become soiled from dust or other causes.

They Make Fine Tall Hedges or Screens

These plants will fit in any landscape planting and should be planted on home grounds everywhere. They can be used as a background like any tall shrub such as the Lilac or Snowball. They can be used as tall hedges or screens and should be planted about four feet apart for this purpose. Planted alone, the branches cut each Winter, they make a beautiful round shrub, an ornament to any home grounds.

Very Large Buds

A promise of Springtime bouquets in Winter—makes fine hedges—when dried they will keep indefinitely—blossoms the first year—a beautiful shrub.

The most interesting plant for the home grounds.

PRICE FRENCH PUSSY WILLOW PLANTS—Size 2 to 3 feet
2 for \$1.00; \$5.00 per 12; \$35.00 per 100; \$250 per 1000.

(We cannot accept orders for less than \$1.00)

THIS BIG SURPRISE BOX

6 Large Evergreens for \$15.00

(JUST AS PICTURED)

ONE PLANT EACH OF THE FOLLOWING

All Plants Balled and Burlapped

1 **AMERICAN ARBORVITAE**—size 2-3 ft. Will develop into a tree 60 feet tall of compact, pyramidal form; leaves bright green above, yellowish beneath. Young trees make excellent specimens in tubs, for decoration of porches etc. also much used in formal gardens and as hedges.

1 **NORWAY SPRUCE**—size 2-3 ft. A tall, picturesque tree, popular as an ornamental and for shelters and wind-breaks; hardy; rapid grower. Foliage shining dark green. Stands pruning well.

1 **RED PINE**—size 2-3 ft. Beautiful

dense tree. Bark reddish brown. Foliage light green.

1 **IRISH JUNIPER**—size 2-3 ft. A slender, columnar form. Branches upright, densely covered with the dark green foliage.

1 **GLOBE ARBORVITAE**—size 18". Symmetrically globular in form and of low, dense growth; beautiful light green. In great demand for formal effects.

1 **SCOTCH PINE**—size 2-3 ft. Robust grower; rigid; very dark green. Wonderfully adaptable to conditions and does especially well at the seashore.

Every Evergreen Guaranteed to be a Transplanted "Glenwood Grown" Plant Selected from one of the Largest Evergreen Stocks in the East.

ANOTHER SURPRISE FOR SPRING PLANTING

Azalea Canescens

6 Hardy Azaleas

A superb assortment of 6 distinct and separate varieties for outdoor planting.

Only \$10

Colors—Deep Pink—
Shell Pink—White—
Orange and Canary.

All plants are well branched, many carry bloom buds and are shipped to you carefully balled and burlapped.

FOLLOWING IS A DESCRIPTION OF EACH VARIETY
6 PLANTS IN ALL—ALL DIFFERENT
Plant Them This Spring—Order Now

ARBORESCENS (*Sweet Azalea*). Very attractive, white or faintly rose-tinted, fragrant flowers whose beauty is enhanced by the long bright red filaments of the stamens. The flowers are borne after the foliage appears, and it is one of the most beautiful of all the hardy Azaleas. In sheltered places it often reached 15 to 18 feet in height. May.

CALENDULACEA (*Flame Azalea*). Probably the most gorgeous of the native Azaleas. From early May until well into the month of June, the plants are literally covered with orange yellow or flamed blooms which in size are often 2 inches across. The well known Ghent Azaleas rarely equal in brilliancy this native species. Foliage remains good until late Fall and breaks in the Spring just before the blooms appear.

CADESCENS (*Piedmont Azalea*). Rosy pink or whitish trumpet shaped flowers of great beauty, borne in May before or with the unfolding leaves, fill the air with sweet fragrance. Plant in masses

against a dark background to show the flower to the best advantage.

NUDIFLORA (*Pinxter Bloom*). An extremely beautiful Azalea. Rosy pink or whitish blooms, after or before the foliage develops, of strong sweet fragrance and borne in great profusion at about the same time as *A. Canescens*. Fall foliage assumes attractive shades of orange and bronze. Fine for dry open places.

VISCOSA (*Swamp Azalea*). The last of the Azaleas to flower, nearly all the other shrubs having passed out of bloom when it bears its heavy load of pure white fragrant flowers, clothed with sticky hairs.

VASEYI (*Pink Shell Azalea*). One of the earliest flowering Azaleas, blooming in April and its glorious pink flowers open before the foliage appears. It is the most beautiful of all the Azaleas, and in delicacy and purity of color is unsurpassed by the flowers of any other plant.

Our "BIG TWELVE" Collection of SHRUBS

Consisting of 12 Big, Choice Shrubs—all Different

This illustrates nicely the effect of flowering shrubs, either about the home, office or factory building. The hedge is barberry—the vine on wall, Evergreen Bittersweet

Everything about this Collection is BIG but the Price—
It's only \$5.00

And every shrub is 2 years old, 2-4 feet in size, well branched and well rooted—A \$7.00 value for \$5.00.

GROWN TO PRODUCE IMMEDIATE EFFECT

We will sell you one of these "big 12" collections for \$5.00. If you bought 100 collections, the price would still be \$5.00 each—Because we regard it as big value for \$5.00.

Place your order now for Spring planting. If after you receive shipment and examine the plants, you would rather have \$5.00 in cash than the plants, we will buy them back for \$5.00 and pay the transportation charges both ways.

HERE THEY ARE, 12 IN ALL—ALL DIFFERENT

WEIGELIA ROSEA (*Pink Weigelia*). An elegant variety with fine rose colored flowers appearing in June.

FORSYTHIA. Graceful, drooping branches covered with the golden yellow flowers before the leaves appear.

RED FLOWERED UPRIGHT HONEYSUCKLE. Bears a profusion of bright pink flowers in the Spring; orange scarlet berries.

SNOWBERRY SHRUB. Pinkish flowers, white berries.

CORAL BERRY SHRUB. Plum red fruits clustered along the branches.

GOLDEN-BARKED DOGWOOD. Conspicuous bright yellow bark, handsome green foliage and immense clusters of large white waxy berries.

HYDRANGEA PANICULATA GRANDIFLORA. The hardest and most popular Hydrangea. In

July and August massive plumes of white flowers, later changing to pink, bend the branches with their weight.

SPIRAEA GOLDEN LEAF. Golden yellow foliage and double white flowers in June. Effective in shrubbery for planting along banks or as screens.

DEUTZIA (*Pride of Rochester*). Large double white flowers which are tinged with pink in the bud.

RED BARK DOGWOOD. Spreading shrub, purple or dark blood red branches, greenish white flowers, berries black.

OLD FASHIONED SWEET SYRINGA. Flowers fragrant, pure white or cream.

WHITE FLOWERED UPRIGHT HONEYSUCKLE. A white variety with a profusion of bright red berries ripening in Summer and persisting until Autumn.

RHODODENDRONS

Now we offer a Special Collection

“Get Acquainted with Rhododendrons Collection”

3 fine plants, 2 - 3 ft. size for \$8.50
A \$11.00 value for \$8.50. *Money Back if not Perfectly Satisfied.*

For years we have specialized in car lots of native Rhododendrons—the most beautiful, attractive and effective native plants that we know of. Shipments have been made to all parts of the United States. Last Spring one prominent banker of Montreal ordered two solid cars for his private estate at St. Bruno, Quebec.

FOLIAGE AND BLOSSOMS MAGNIFICENT

Many persons with limited planting area who have seen the marvelous green foliage and beautiful blooms of Rhododendrons have possibly wondered where plants would be obtained in small quantities.

One of our Maximum 2-3 ft. size.

We offer you one each of the following varieties:

AROLINIANUM. This is one of the finest introductions and fills a long felt want for an absolutely hardy Rhododendron with clear pink flowers free from any hint of magenta. Stands exposure unusually well and is invaluable as a single specimen or for massing. (Price sold singly \$4.00)

CATAWBIENSE. We recommend it as one of the finest for general use withstanding exposure and extremes of tem-

perature well. It is a very free bloomer with foliage of a dark rich lasting green, which never rusts. The trusses of flowers are a bright red-purple. (Price sold singly \$4.00)

MAXIMUM. (Great Laurel). A well known native of our mountain regions with great clusters of white or rose-pink flowers in June and July, just after the hybrid varieties have ceased blooming. (Price sold singly \$3.00)

We are planning to dispose of several acres of plants, selling them in these small collections. They may be planted during April, May and June, but we suggest that you order immediately for shipment at the proper time for planting in your locality.

For price in car lots see page 7 of our general catalogue.

WANT A ROSE GARDEN—A REAL ONE? WANT IT TO BLOOM THIS SUMMER, ALL SUMMER?

Plant Glen's Big 10 "Bloom All Summer" Roses.

10 big bushes, 2 years old, all outdoor grown. The greatest assortment of Roses Glen ever offered and at the lowest price. Only \$9.00.

HERE THEY ARE—YOUR FULL MONEY'S WORTH—READ 'EM AND ORDER

LOS ANGELES. Flame-pink. Shaded gold. Intensely fragrant, and one of the most beautiful roses.

ROSE MARIE. One of the best bedding Roses grown, remarkably free-flowering, producing large, long ideal buds which develop into full flowers of beautiful form, of a most pleasing clear rose-pink.

SENSATION. Bud is large, long pointed; the expanded flower very double; averaging 5 inches across; very lasting. The finish suggests rich velvet in color a scarlet crimson deepened over all by glossy maroon. The foliage is dark, and the scented bloom profuse.

OLD GOLD. Flowers vivid reddish orange with rich coppery red and coppery apricot shadings. Sweetly scented. Growth vigorous. Continuous flowering. This Rose is regarded one of the most beautiful decorative and bedding roses.

IRISH FIREFLAME. A glorious single-flowering variety bearing its flowers in clusters of five or more; splendid for cutting in sprays in bud form. These buds are wonderfully rich in coloring, a rich deep orange splashed with crimson, opening to a large single flower of a satiny old-gold shaded with ochre.

MME. EDOUARD HERRIOT (*The Daily Mail Rose*). Coral red buds, shaded yellow; flowers copper-orange, semi-double, tinted yellow and

scarlet; hardy. Winner of the \$50,000 prize offered by the London Daily Mail.

MRS. CALVIN COOLIDGE. The beautiful new Rose named after the good wife of our President, is a sport of that wonderful Rose, Ophelia. Its color is a bright yellow, changing to deep orange as the flower develops.

RADIANCE. Supreme as the best pink Rose in cultivation. Elegant large flowers are cup-shaped, light silvery flesh to salmon pink with opaline. A constant bloomer and delightfully fragrant.

SOUVENIR DE CLAUDIUS PERNET. Pure yellow.

IMPERIAL POTENTATE. Introduced only five years ago, this beautiful variety has already found a place among the most popular garden sorts. Its splendidly shaped buds develop into large, sweet scented double flowers of crisp, glistening rose-pink with silvery suffusion at the base of the petals. Of strong, vigorous erect habit of growth, and very free flowering.

25 DIFFERENT PLANTS IN ALL

ANEMONE WHIRLWIND. Very large double white. Blooms September to October. 2-3 ft.

AQUILEGIA CANADENSIS. Scarlet and yellow. Blooms May to June. 2 ft.

CAMPANULA MEDIUM (Canterbury Bells). Large cup shaped flowers, rose. Blooms June to July, 2-3 ft.

CHRYSANTHEMUM MAXIMUM. (Shasta Daisy). Large snow-white flowers, blooming all Summer. 3-4 ft.

CHRYSANTHEMUM HARDY POMPOM. Bronze. Blooms September. 3-4 ft.

COREOPSIS LANCEOLATA. Rich golden yellow flowers nearly all Summer. 2 ft.

HELENIUM (Riverton Gem.) Old Gold, changed to red. Very beautiful plant. Blooms August to October, 2 ft.

HEMEROCALLIS FLAVA (Lemon Day Lily). Fragrant golden yellow flowers in large clusters. Blooms in May. 2 ft.

LIATRIS (Kansas Gay Feather). Flowers purple in dense like spikes. 4-5 ft. high. Thick grass-like foliage. Blooms July to August.

PHYSALIS (Chinese Lantern Plant). Very large orange red fruits. Suitable for Winter decorations. 2 ft.

ORIENTAL POPPY. The showiest of the poppies with great silky scarlet and red flowers on long stems. Blooms in May. 2-3 ft.

PYRETHRUM ROSEUM. Finely cut foliage and daisy-like flowers on long stems. Blooms June. 1½ ft.

FUNKIA (Plantain Day Lily). Handsome broad foliage and fragrant lily-like flowers in late Summer. 1 ft.

DIGITALIS (Fox Glove). Stately plants bearing long spikes of tubular flowers in July and August. 2-3 ft.

DELPHINIUM BELLADONNA. Clear turquoise blue flowers. Blooms July to August. 4-5 ft.

DIANTHUS BARBATUS (Sweet William). An old time favorite that is hardy, beautiful and free flowering. In various tints and shades. Blooms May and June. 1½ ft.

GAILLARDIA GRANDIFLORA. A fine large flower; brown center surrounded with crimson rings and yellow border. Blooms all Summer. 2-3 ft.

GYPSOPHILA PANICULATA (Baby's Breath). Mist-like sprays of minute white flowers. Fine for bouquets. Blooms continuously. 2 ft.

ACONITUM FISCHERI. Dark blue. Blooms September and October. 2 ft.

ASTILBE JAPONICA (Spiraea). Queen Alexandra. Pink. Blooms June and July. 2 ft.

VERONICA LONGIFOLIA SUBSESSLIS. Dark blue. Blooms August and September. 2 ft.

IRIS DALMATICA. Clear lavender blue. Blooms May early June. 2 ft.

MONARDA DIDYMA. Bright red. Blooms June to August. 3 ft.

OENOTHERA FRUITICOSA. Yellow. Blooms June to August. 2 ft.

PHYSOSTEGIA VIRGINIANA. Pink. Blooms June and July. 2-3 ft.

We know of no tree grown that can give the tall slender columnar effect so much desired in certain landscape treatments as

LOMBARDY POPLAR

GROWS RAPIDLY

Their great height, dense slenderness and somber silhouette against the skyline, creating an impressive picturesque old-world effect.

Grows from 40 to 80 feet in height. Is extensively planted in fine estates, along driveways and for backgrounds. Gives a most artistic effect as it catches the eye from a far distance, on account of standing out prominently against the sky line. Its branches are crowded, all growing upward. Fills a place that no other tree can fill.

The selective appreciation of trained landscape builders is getting this fine type into much more general use. Old trees which were thoughtfully placed, are outstanding landmarks today.

As a highway border, tall hedge, windbreak, screen or for formal effect, it is ideal.

REDUCED PRICES Order immediately

8-10 ft. size \$1.50 each, \$12.00 for 10, \$100.00 for 100. 10-12 ft. size \$2.00 each, \$18.00 for 10, \$150.00 for 100. 12-14 ft. size \$2.50 each, \$22.50 for 10, \$200.00 for 100.

JUST A BIG BOUQUET WHEN IN BLOOM

Line the Driveways and the Byways With Hydrangea Paniculata Grandiflora

which we have trained to grow in Standard or Tree Form

(SEE ILLUSTRATION)

Ideal for tubs or lawn planting. Produce largest flower heads of any of the hardy shrubs—these immense cone shaped pinkish color flowers are borne in August and September when few other shrubs are in bloom.

Blooms last 'till long after the first frost.

HYDRANGEA PANICULATA GRANDIFLORA—in standard or tree form is very effective planted along the sidewalks or driveways, setting the plants about 10 feet apart. They make a most beautiful sight when in full bloom. It is also very desirable planted in pairs on either side of a formal entrance and is very decorative in the formal garden or in the cemetery.

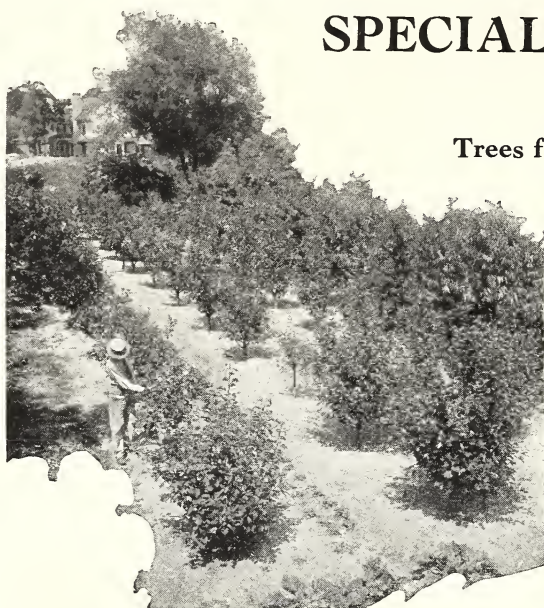

We have a grand lot of standards grown expressly to flower for you this Summer—plant them this Spring—order to-day.

Just a few of the Big Buster 4 year old apple, large, beautiful trees; straight trunks, well shaped, branched tops. Note how they tower over the evergreens in the foreground which average about 3 ft. in height.

These are the Trees — 7-8 ft. tall

PLUMS

BRADSHAW. Very large; dark violet-red.

GERMAN PRUNE. Large, oval, dark purple.

YELLOW GAGE (*Prince's Yellow Gage*). Large oval, golden yellow, slightly clouded, flesh deep yellow, rich sugary, melting.

LOMBARD. Medium size, violet red.

BURBANK. Large, nearly globular, clear cherry red, sweet, meaty and quite firm.

OCTOBER PURPLE. Large, round, purple.

RED JUNE. Professor Baily says, "By all odds, the best Japanese Plum." Large, brilliant red.

PEARS

BARTLETT. Large, waxen, yellow with red blush, buttery, very juicy and high flavored.

ANJOU (*Beurre d'Anjou*). Large handsome, greenish yellow with a dull red cheek on the exposed side flesh fine grained.

CLAPP'S FAVORITE. Very large yellowish, green to full yellow, rich.

ANGOULEME. Large, greenish yellow, splashed with russet, a good bearer.

SECKEL. Small, but handsome and delicious; very juicy.

KIEFFER. Large, very handsome, rich yellow, tinged red, excellent when canned.

QUINCES

ORANGE. Large, brilliant, golden yellow, flesh tender and flavor good; tree productive if well cultivated. Late September.

A Timely Spring Offering of Three Dwarf Flowering Trees For the Lawn

These small ornamental trees produce a mass of bloom in early Summer, filling the air with their delicious fragrance. They require little room, may be planted either in the shrubbery border or as individual specimens in the lawn.

This is the Flowering Almond. The Cherry and Plum are just as pretty.

This assortment consists of the following:

DOUBLE ROSE COLORED ALMOND. A vision of loveliness not equalled by anything else that blooms at the same time. The profusion of its bloom is amazing. Sold singly \$1.50 each.

DOUBLE FLOWERING PLUM. A small tree with graceful, slender branches, literally covered with double pink flowers in early Summer. Individual flowers one inch across. Sold singly \$1.50 each.

DOUBLE FLOWERING CHERRY. A medium size tree. Clusters of double white flowers in May with such profusion that the branches are completely hidden. Sold singly \$3.50 each.

These trees sold separately at our regular catalogue prices would cost you \$6.50. We offer for Spring planting 3 trees, one of each variety as described.

\$4.50 ORDER IMMEDIATELY \$4.50
FOR SPRING PLANTING

ROCHESTER INVITES You on LILAC DAY

Lilac Day is a Big Day in Rochester—A Gala Day!

People come from far and near to visit Rochester's famous Highland Park collection—*thousands and tens of thousands of people to see thousands and ten of thousands of beautiful lilac blooms*—this is a real Flower Show.

Highland Park contains one of the finest if not the finest collection of hybrid Lilacs in the whole world—and Oh! what a display there during May. If you cannot personally visit each year this wonderful display, you can at least have some of these choice varieties to grow in your own grounds.

EVERY LILAC WE SELL IS A HIGHLAND PARK VARIETY

Because our original scions were obtained from plants in the Highland Park collection. The late Mr. John Dunbar, who became famous as Assistant Superintendent of Highland Park, aided us in selecting the varieties for our collection of more than 30 varieties.

Now we offer you 6 of these grand varieties
One Plant each of the following

for \$10.00

VARIETIES

PRINCE NOTTINGER. A strong rapid growing variety with large shining leaves. Color carmine, red in bud. Lilac when open. Truss large, distinct.

VIVIAND MORELL. Double clear Lilac flowers, having white center with vilaceous reverse. A "pippin."

PROF. STOCKHARDT. Very large panicles of delicate rosy pink flowers, the individual flowers

unusually large. One of the finest.

CHARLENBURG. Very large. Fine globular form. Color rosy Lilac. Beautiful. One of the best Lilacs we grow.

W. C. BARRY. Broad large panicles, clear silvery lavender. An unusual Lilac.

ADELAIDE DUNBAR. Violet red. Flowers gorgeous and are produced in handsome clusters. A show Lilac.

All plants offered are 2-3 ft. in size. The biggest bundle of pleasure you ever bought. Order yours to-day.

BLUEBERRIES

Nursery Grown Plants

CAN you imagine anything more satisfactory than having delicious blueberries growing in your own garden? No doubt you have enjoyed these wonderful fruits on the hotel or restaurant menu, served with cream for breakfast, or as blueberry pie or dumpings for luncheon or dinner. They are a fruit that satisfies for three meals a day and one dozen plants are quite sufficient to supply the average family with blueberries. They can be used freely for making breakfast muffins or preserves.

HARDY AND ORNAMENTAL

Nor should the ornamental value of Blueberries be overlooked. Prof. Bailey says: "In the Spring the young shoots and leaves are a rich bronzy red, later the clusters of long white flowers, followed by clusters of dainty pink buds. In Winter the red bark creates a charming tracing of red twigs against the snow. Rarely does a plant or shrub combine such exquisite beauty with a fruit, than which there is none more delicious. It is one of the most valuable species both for fruit and as an ornamental shrub. It thrives in the garden and is readily susceptible to improvement by cultivation."

Try a Dozen this Spring. Fruiting Season Early July 'till Late Summer.

All plants dug and shipped with roots in ball of acid soil, burlapped.

Maine's Blueberry crop is worth \$1,250,000 in the state.—*Rochester Democrat & Chronicle, Dec. 30, 1928.*

PRICE

\$1.50 each \$15.00 per dozen
\$100.00 per 100

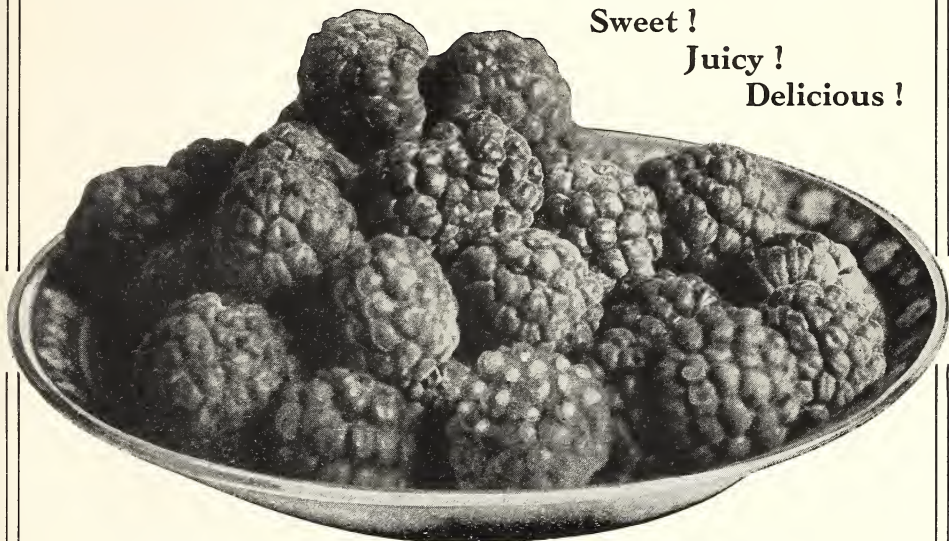

CULTURAL DIRECTIONS: Blueberries require an acid soil to produce the best results. This is prevalent in many sections of the country. Where your soil is not acid, we suggest the following method to get the most from your plants. Choose a well-drained location, easily supplied by water during the dry summer months. Blueberries do best with full sun, although they will grow and produce fruit in partial shade. In order to get the proper acid condition to your soil, mix partly rotted leaves with the soil of your garden. A heavy mulch each Fall of partly rotted leaves will maintain the acidity of the soil. Do not remove this mulch, but let it remain throughout the year.

Never use manure or compost near a blueberry plant. No pruning is necessary except as a branch may become damaged or stop bearing. Water your plants well the first year, soaking the ground two or three feet away from the roots.

Nursery grown Blueberry plant balled and burlapped ready to pack for safe shipment to any part of U. S.

BIG LUSCIOUS LATHAM THE BIG RED RASPBERRY

Latham rules supreme in the Red Raspberry field
5430 quarts per acre—\$1629.00 per acre

The following is reprinted from the Connecticut Agricultural Review of September 1925. W. H. Darrow, Fruit Specialist.

REPORT on three-year-old field (PER ACRE)

Latham, 5430 quarts; Herbert, 3648 quarts; Cuthbert, 3600 quarts

**IN 1927 THE AMERICAN POMOLOGICAL ASSOCIATION
AWARDED LATHAM THE WILDER MEDAL**

Latham is so far superior to any red Raspberry we have ever grown or seen that we will pay \$1,000.00 cash for the exclusive selling rights of any new red Raspberry that is superior to Latham in hardiness, productiveness, size and color.

Resistant to severe Winter conditions. One of the most, if not the most productive raspberry and commands a premium.

From the Gardener's Chronicle

Harold M. Bryant, in *Gardener's Chronicle*

"The Latham is without doubt the best red raspberry for the grower to plant today. It has proven entirely hardy in the Dakotas and the Northwest. It is a splendid cropper, bearing fruit the largest and firmest I have seen of any variety and holding the size throughout a long picking season. It is a pleasure to pick berries of such size and of delectable appearance."

If your garden is small and your family is small, set a dozen plants. If you have sufficient planting area available, set 100 plants. If you desire to grow raspberries commercially, set 1000 plants. Whether you plant one dozen or 1,000, there is nothing you can plant that will give you more pleasure and satisfaction in the fruit than Latham.

Price for strong 100 per cent healthy, two year transplants—
12 for \$2.50 100 for \$15.00 1000 for \$100.00

Do not confuse our plants with the small lighter grades that are being sold by many Nurserymen at low prices. If upon receipt of shipment, the plants we send you are not the finest, largest and best rooted you have ever seen, wrap them up and return them and we will refund your money and pay the transportation charges both ways.

Big Juicy Grapes for Delicious Grape Juice or Eating Fresh

A 3 Year Old Field of Bearing Grape Plants at Glenwood Nursery

PLANT OUR BIG 3 TO 4 YEAR OLD VINES—Splendid Roots—Branched Tops

Many of these plants have produced large bunches of delicious grapes in the Nursery row the past Fall. *When these Nursery plants were in bearing we dug one of them and photographed it and this photograph is reproduced on this page.*

WE OFFER THE FOLLOWING VARIETIES OF EXTRA HEAVY 3 TO 4 YEAR OLD VINES

Planted this Spring, many of these vines should produce fruit next Autumn.

CONCORD (Black). Large and handsome very hardy, productive and reliable, succeeds well over a great extent of country, and is one of the most popular market grapes.

IVES (Black). Bunch extremely large, shouldered, compact, handsome; berry large, tender, juicy. Sprightly vinous, rich sweet without pulp. Vine is vigorous, healthy, hardy.

LUCILE (Red). Bunches very large and compact; berries large, rich dark red; pulp sweet and delicious; vine extremely hardy, healthy and bears tremendous crops.

DELAWARE (Red). One of the finest of our native grapes. Ripens early. Bunches small and compact; berries small, light red, with a violet bloom, beautiful, sweet, sugary and vinous, with a musky aroma.

CATAWBA (Red). Bunches large and loose; berries large of coppery red color, becoming purplish when well ripened; vinous, rich.

CAMPBELL'S EARLY (Black). Clusters large and handsome, berries large, nearly round, black with light purple bloom, flesh rather firm, but tender; quality rich, sweet, slight vinous; a strong and vigorous grower.

BRIGHTON (Red). Flesh rich, sweet and of the best quality, equal if not superior to Delaware; ripens early. Productive and vigorous.

NIAGARA (White). Bunch medium to large, compact, occasionally shouldered; berry large,

roundish, uniform; skin thin but tough; pale green, changing to pale yellow; with a thin whitish bloom; flesh slightly pulpy, tender, sweet, ripens with the Concord.

Lexington, Ky. February 23, 1927

GLEN BROTHERS, INC., Rochester, N. Y.

Dear Sirs: Two or three years ago while living in the Kentucky mountains at Coxton, I bought from you a Niagara grape THAT BORE THE YEAR IT WAS SET OUT. I am now living at Lexington, Ky. and have a little room in my yard for a few vines. I want one each of a Niagara, Delaware and Champagne grape that will bear this year. Have you them? If so, please let me know the price.

Truly yours, F. A. ATKINS, 463 Oldham Ave.

MARY WASHINGTON ASPARAGUS

There is no variety of Asparagus as good as the Washington, and no strain of the Washington near as good as the "Mary."

**100 of these whopping big 3 year
old plants \$7.00**

500 plants for \$30.00

1000 plants for \$55.00

HOW TO MAKE AN ASPARAGUS BED

To make an Asparagus bed, prepare a place of fine, loamy soil, to which has been added a liberal dressing of rich manure. For a garden, set in rows, eighteen to twenty inches apart with the plants ten to twelve inches apart in the rows. Make a small mound of the soil, over which the roots should be spread, then cover the plants with about three inches of coarse stable manure, which may be lightly forked in between the rows as soon as the ground softens in the spring.

MARY WASHINGTON ACTUAL SIZE OF STOCK

Dwarf Apple Trees to Bear Immediately

This tree planted in Spring, bore 5 perfect apples in September of same year planted.
It's a Glenwood tree.

Producing the same size and same quality of fruit as the standard tree.

It is not necessary to wait for years for fruit if you plant our Dwarf trees this Spring—they frequently bear the first year planted.

Some of the Finest Apple Orchards in New York State are Planted with Dwarf Trees.

AN ALL SEASON DWARF APPLE COLLECTION

VARIETIES

- 1 RED ASTRACHAN. Large; deep crimson; juicy.

Price for 3 Assortments 13.50

Price for 4 Assortments 18.00

Set trees 12 ft. apart each way or 300 trees to the acre.

CHINESE ELM

"Greased Lightning" would be a better name for this remarkable tree. It's the fastest growing shade tree we know of.

This tree grew 20 ft. in 4 years

is healthy and beautiful and will give an abundance of shade in a very short time. It fully justifies the claims of the United States Department of Agriculture wherein they state—"It is very hardy and has proved valuable under a greater variety of climatic soil conditions than any tree yet introduced.

HOME OWNERS, REAL ESTATE MEN, CITY PARK BOARDS AND OTHERS equally interested in securing quick shade with a minimum of time and expense will find in this tree the essential characteristics they desire.

PRICES FOR SPRING PLANTING

Size	Each	10	100
4-5 ft.	\$2.00	\$17.50	\$150.00
5-6 ft.	3.00	27.50	250.00
6-7 ft.	4.00	35.00	300.00

Order early—our supply is limited.

We illustrate—a 4 year old tree that was but 5 ft. in height when planted. In 4 years this tree has grown to a height of 20 ft. with a spread of 18 ft. and measures 20 inches in circumference 18 inches from the ground. **Think of it a real shade tree in 4 short years.**

BEAUTIFUL—

FAST GROWING

—HARDY

Our country is speeding up to a fast pace, where once the automobile satisfied because it was faster than the horse, we now demand the airplane. Radio and Air Mail speed up communications. People want results **NOW**. They want shade for themselves—not for future generations only. **Chinese Elm solves the problem.**

**GOOD FOR
WIND BREAKS OR
SCREENS**

Its habit of growth makes it an ideal tree for street planting in the city—for roadside planting in the country, or for shade around the home in either city or country. The tree

HARDY NUT TREES

For Spring Planting

4 Year Old Seedling English Walnut Tree at Glenwood Nursery That Has Produced Nuts

AMERICAN BLACK WALNUT—The Black Walnut is one of America's most useful nut-bearing trees. In fertile, loamy soils underlaid with firm clay subsoils, moist yet well-drained, it is one of the most rapid growing of America's valuable forest trees. It should never be planted in coarse, gravelly, still heavy clay, or thin loamy soils. For roadside planting and for reforestation, we have these valuable trees in quantity at the following prices:

	Each	Per 10
4-6 ft.	\$1.00	\$ 9.00
6-8 ft.	1.50	12.50

ENGLISH WALNUT. Every English Walnut tree we sell was started from seed produced from a bearing tree in this locality—every tree is guaranteed to be a "Glenwood Grown" tree, hence our trees are very hardy. Such trees are the only safe trees to plant in Northern latitudes. Neither our young nursery trees nor our six or seven year old bearing trees have ever shown the slightest evidence of injury from Winter temperatures of eighteen to twenty degrees below zero.

Plant a few of these trees this Spring. In your available space a few hardy, vigorous English Walnut trees will prove valuable for decoration, shade and allow a household supply. The smooth bark is light gray in color, and the leaves are long, deep green and waxy. The English Walnut is a rapid grower.

	Each	Per 10
2-3 ft.	\$1.50	\$12.50
3-4 ft.	2.00	17.50
4-5 ft.	2.50	22.50

JAPANESE WALNUT. Nearly as hardy as the Black Walnut and is especially appropriate for farm and dooryard planting. It is a dwarfish species with dull green rough leaflets, often as many as fifteen or seventeen to the leaf, and bears in racemes of a dozen or more. The shells are thinner than those of the Black Walnut but thicker than those of the Persian Walnuts.

	Each	Per 10
6- 8 ft.	\$2.00	\$17.50
8-10 ft.	3.00	27.50

THESE SMALL FILBERT BUSHES ARE BEARING EVERY YEAR

HARDY NUT TREES—Continued

BUTTERNUT. One of our finest native nut trees.

	Each	Per 10
5-7 ft.	\$1.50	\$12.50

HICKORY. Shagbark. (*Hicoria Ovata*). Esteemed as the choicest of native nuts.

	Each	Per 10
2-3 ft.	\$1.50	\$12.50

ALMOND (*Amygdalus Communis*). Hardy wherever peaches grow; easy of culture. Hard-shell. Very showy in bloom; nuts plump and sweet.

	Each	Per 10
3-4 ft.	\$1.00	\$ 9.00
4-5 ft.	1.50	12.50
5-6 ft.	2.00	17.50

FILBERT

Trees grown at our Nurseries are withstanding temperatures of 15 degrees below zero without winterkilling, which should be sufficient warranty of their hardness throughout the eastern and northeastern sections to call for extensive plantings.

PURPLE LEAVED. One of the best American varieties.

18-24 inch \$1.50 each

HAZELNUT (American Filbert). Ranks high as an ornamental and bears large quantities of sweet flavored nuts.

2-3 ft. \$1.00 each

KENTISH COB (English Filbert). Productive of large, oblong nuts of rich flavor. Layered plants.

2-3 ft. \$1.50 each

COSFORD (Paper Shell). European variety highly prized for thin shelled nuts of richest flavor.

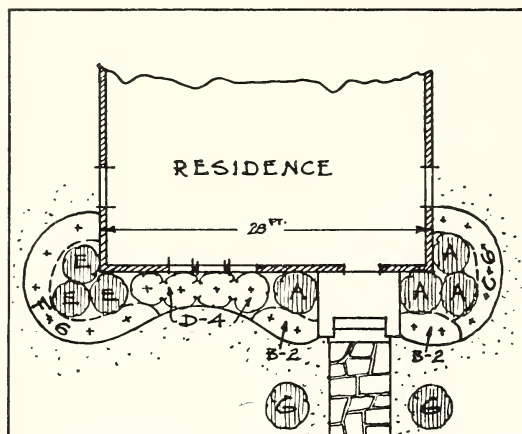

2-3 ft. \$1.50 each
